

Falls detection made easy

Introduction to our panellists

Beverly Futtit

*Digital Transformation Lead,
National Care Forum*

Dr Lis Boulton

*Health and Care Policy
Manager at Age UK and Co
Chair of the National Falls
Prevention Co-ordination Group*

Fiona Brown

*Former DASS and Chief Care
Officer, Lilli*

Topic 1

The challenge we
need to solve

73%

of care home
residents have been
admitted into hospitals
**following falls
incidents** over the last
two decades.

Topic 2

Why falls detection technology is the place to start

- ⌚ A typical care home spends **13,000 hours** per year on falls and nighttime checks
- £ Costs of supporting residents after falls are in excess of **£150,000** annually.

Topic 3

Overcoming the initial barriers to adoption

Topic 4

Driving change and building engagement

Topic 5

The bigger picture
– what can falls
detection and data do
for care homes in the
long-term

*“Being able to do that real-time analysis in a much more effective way can help people **start predicting** these things and stop them before they happen”*

Carrie McDonald

Clinical Lead and Safety Officer, Nourish
